Safer Roads for Hays County Families

We live in one of the fastest growing counties in Texas. Unfortunately, our roads have not kept up with this growth, making many roads dangerous to drive on.

We now have a chance to plan for our future and make our roads safer for everyone.

The Hays County road bonds will improve safety by converting I-35 frontage roads to one-way only, widening dangerous roads like FM 1626, improving intersections on RR 12 with turn lanes, adding contiguous turn lanes and widening shoulders on Highway 290.

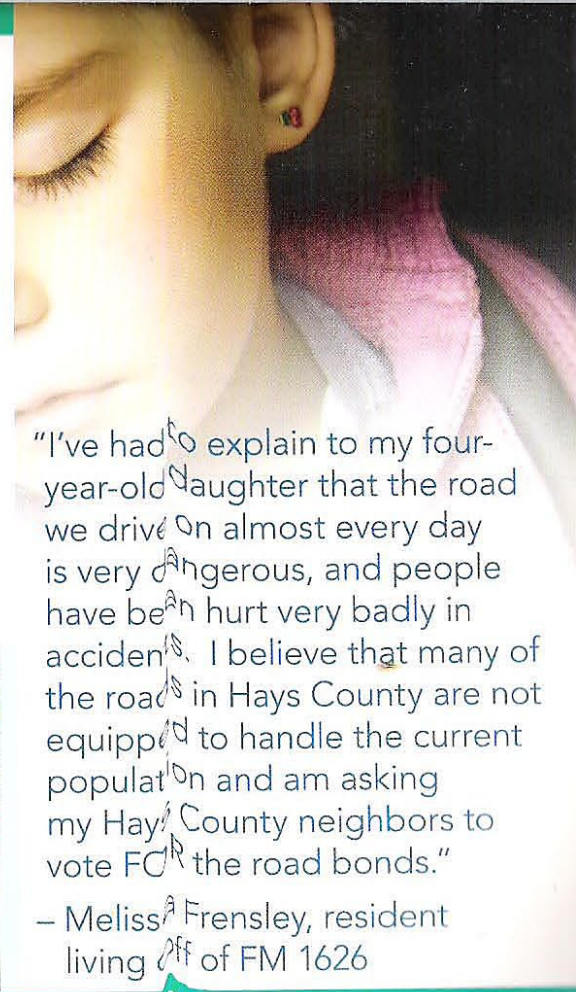

Let's make our roads safe.

Vote FOR the Hays County Road Bonds.

Are safer roads worth \$6/month?

The road bonds will deliver safer, less congested roads throughout Hays County for \$207 million, yielding an estimated cost of \$6/month for the average taxpayer.

Of the total amount of the bonds, up to \$133 million will be repaid to the County from the State of Texas through a system called pass-through financing.

"I've had to explain to my four-year-old daughter that the road we drive on almost every day is very dangerous, and people have been hurt very badly in accidents. I believe that many of the roads in Hays County are not equipped to handle the current population and am asking my Hays County neighbors to vote FOR the road bonds."

— Melissa Frensley, resident living off of FM 1626
